

Garadagh Ekspert Plus

CEM I 52,5 N - high strength pure portland cement

Technical brochure

Garadagh Ekspert Plus

High strength pure Portland cement

Recommended applications:

- High strength concrete for special projects
- Reinforced precast concrete elements with high final strength
- Pre-stressed precast concrete structures and elements with high final strength
- Concreting in cold weather

Benefits:

- Possibility to slightly decrease expenses in water reducing chemical admixtures due to high strength of the cement
- Ideal for adding other mineral components on site for even better performance

Standards:

- AZS 411:2010
- EN 197-1:2000

Phone: (+99412 441 88 88)
