CEM II/A-L 42,5 R – rapid hardening portland cement
with active mineral additives

Technical Brochure

Garadagh Ekspert

High early strength Portland cement with active mineral additives

Recommended applications:

- Reinforced concrete structures with high strength class
- Dry mixes (i.e. adhesive, gap filling, Isolation materials)
- Ordinary and reinforced precast concrete products and elements
- Pre-stressed precast concrete elements

Benefits:

- High versatility allowing use in a wide variety of concrete applications
- Compatible with most admixtures and Supplementary cementitious materials

Standards:

- AZS 411:2010
- EN 197-1:2000
